

Teacher's Notes

- Can students read the story by themselves?
- Do they comprehend what they have read?
- Check the student's stories for accuracy and detail.

Suggested Activities:

- ❖ Act out a play based upon the story.
- ❖ Prepare a Science experiment showing the students that water will always flow to the lowest point. Fill a small basin full with water and place a large object in the basin representing the elephant. The water will spill out. Show the students that something solid placed in the basin will push the water out. As in the story.
