

Implosion

An implosion is the reverse of an explosion. An implosion occurs when a vessel collapses inward. This is caused by a difference in the pressure outside and inside a vessel. We could say the implosion of a light bulb.

Could you think of some other examples of implosion?

Use a dictionary for the following activity.

Part of a word is written beginning with *impl-*, finish the word correctly.

Several choices are possible.

<i>e.g. impla-</i>	<i>implacable</i>
