

Lapis Lazuli

Lapis Lazuli is a beautiful, deep blue stone which can be cut and polished to make ornaments.

How many other words can you make using only the letters from:

'Lapis Lazuli'

Lapis Lazuli can be violet or greenish-blue and may contain tiny, shining specks of pyrites. Lapis Lazuli is really too soft for most jewelry. In powdered form, it was once used for the pigment ultramarine. Chemically Lapis Lazuli is a silicate of aluminium and it is mined in California, Chile, Russia and Afghanistan.
