

Teacher's Note

- A robot space probe is used in space for scientific purposes.
- A bomb-disposal robot is used to diffuse bombs.
- Students can be creative when drawing their robot. They could glue flaps on their drawing showing other robot parts underneath.
- You could build a large robot as a class project to save recycling materials.

Suggested Activities:

- ❖ Visit an exhibition like Sci-tech. A place where science and technology are widely used with hands on experiments and fun learning activities.
- ❖ Visit a museum which has 'old technology' on display.
- ❖ A drink machine is like a robot. Ask students if they know of other robot like machines.
- ❖ Visit: <http://www.howstuffworks.com/>
